

Ecological & Economic Buildings

ACTIV HOME is the first manufacturer of **low-carbon walls and floors** from local industrial production, using directly available straw.

Thanks to an innovative patented process, **build passive houses with a negative carbon footprint** for the price of a traditional building.

Buy or rent the process!
For all builders, developers and investors who wish to develop passive and low carbon buildings

Contact us to implement the process in your area. We will bring you all the necessary expertise to invest in these sustainable constructions.
